Adelphoi Education at Latrobe

Partial Hospitalization

The Partial Program is designed to accept children who require a higher level of structure and support than traditional mental health outpatient treatment, but who are not showing the level of acuity that would necessitate mental health inpatient treatment. This allows the child to remain at home in their community while receiving mental health treatment and educational support. Both regular and special education students are accepted.

The Emotional Support Program

The Emotional Support Program provides temporary placement for students in grades 1-8, helping them successfully transition back to their home schools. A licensed mental health professional offers on-site therapy, using DSM-5 assessments to create individualized treatment plans based on the student's needs and IEP. Interventions include Cognitive Behavioral Therapy, Dialectical Behavioral Therapy, stress reduction, and social skills development, all through a trauma-informed approach. Family engagement and collaboration with other service providers are essential to the program's success.

Criteria for Enrollment

Intake criteria are developed in collaboration with the referring school district. Students referred must have in Individual Education Plan and exhibit difficulties in the public school setting due to a variety of reasons, including but not limited to emotional support needs, disruptive behavior, and truancy concerns. Upon referral, an intake meeting will be held with the student, their family, and any support services in place for the student. Other participants include Classroom Teachers, School Based Mental Health Therapist, and Administrative Staff. A decision will be made regarding enrollment at the conclusion of the meeting and communicated with the home district and family if the student is a good fit for the program. Student success relies heavily on a collaborative effort of the team, including family cooperation and input.

Why choose Adelphoi?

- *Strong continuum of care*
- *Outcomes-driven, evidence-based programs*
