Meals During School Closure

Adelphoi Education Services understands that school breakfasts and lunches can be an important part of our students' everyday nutrition plan. During this school closure, it becomes even more of a burden on each of our families to provide meals to students that would typically be eating them at school.

Please look on your home district's website for information on free drop-n-go food sites near you. Additionally, many local businesses are offering free meals to students in need in most communities. If you are finding it difficult to connect with any of these opportunities, please contact your principal or any of the staff members of Adelphoi Education Services and we will work to ensure you are provided with meals during this difficult time.
